

A man with dark hair and a beard, wearing a red long-sleeved shirt, is sitting at a desk and typing on a laptop. He is looking down at the keyboard. The desk is white, and the laptop is silver. In the background, there is a large window with a view of a city skyline. The overall lighting is bright and natural, suggesting a daytime setting.

IoT solutions by randstad.

Enhanced operational performance.
Measurable bottom-line value.

With new trends and technologies constantly emerging, our solutions are evolving right alongside to create value for clients like you. Our IoT specialty is a case in point. It builds on and bridges core technology competencies, from engineering solutions to application services, infrastructure services, end-user support services, strategy, architecture and more, to address even your most complex IoT challenges.

our approach

Wherever you are in your IoT journey — and no matter what platform you’re using — we can develop and implement solutions to help you more effectively capture data, monitor devices, automate reporting and see the maximum value from IoT investments.

Our IoT solutions include the following areas of expertise:

business applications

From enterprise apps to data management to analytics and modern web apps, our experts can build applications to leverage the value of your IoT platform.

“things”

Development of hardware and software to get your devices connected to the internet in order to support your IoT strategy.

connectivity infrastructure

Leverage network communications, network gateways and mobile/edge computing to optimize the connectivity of your “things.”

user applications

Create best-in-class mobile (iOS and Android) and web applications to provide access to your IoT devices and data to deliver exceptional experiences for your employees and/or customers.

Beyond the above key elements, Randstad also can assist you with primary IoT supporting functions such as governance, operations, support services and security best practices.

the randstad advantage

Unmatched talent. Customized solutions and services. Global delivery. No other professional services firm brings these three strengths together to be your implementation partner. But that’s what you’ll get with Randstad Technologies, and it’s what sets us apart.
